Executive Summary

Total sale amount from all customers over the 4 year period is \$987 million dollars.

The customers ranged from 18-33 years old. The top 5 age groups with the average highest purchasing behavior are:

- 33 year olds (\$7,034.16)
- 21 year olds (\$7,013.03)
- 27 year olds (\$6,911.21)
- 31 year olds (\$6,827.99)
- 22 year olds (\$6,822.02)

Customers with a monthly income below \$10k (\$7,056.70) had a higher average purchasing behavior than customers with monthly incomes between \$10k-25k (\$6,239.17), \$25k-50k (\$6,545.11), more than \$50k (\$6,697.62), or no income (\$6,539.62).

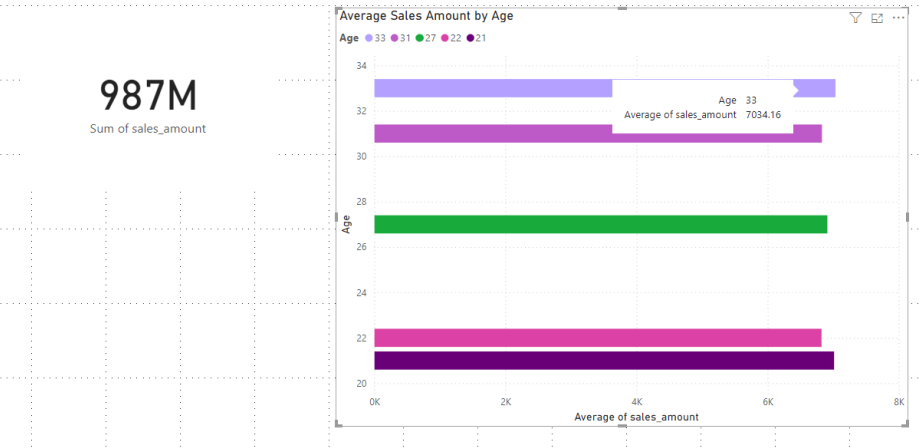

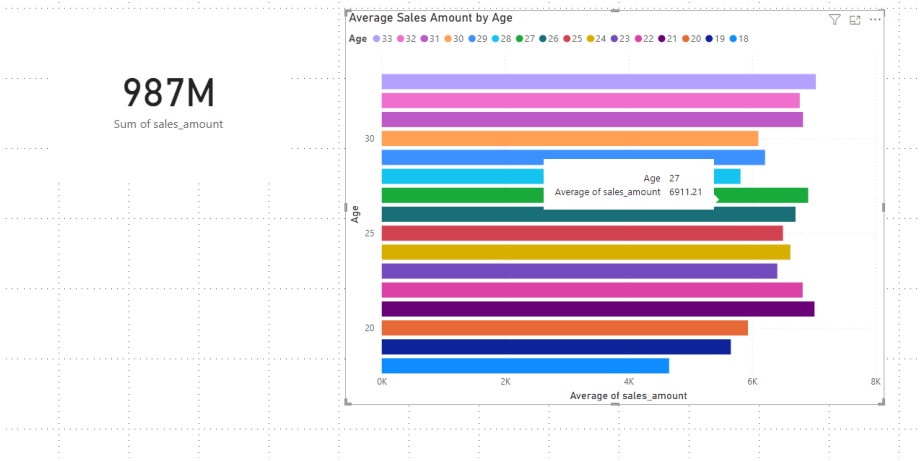

Single customers (\$6,556.10) on average have a higher purchasing behavior than married customers (\$6,447.37) by \$108.73.

- However the demographic with the highest spending behavior prefer not to say (\$7,801.66)

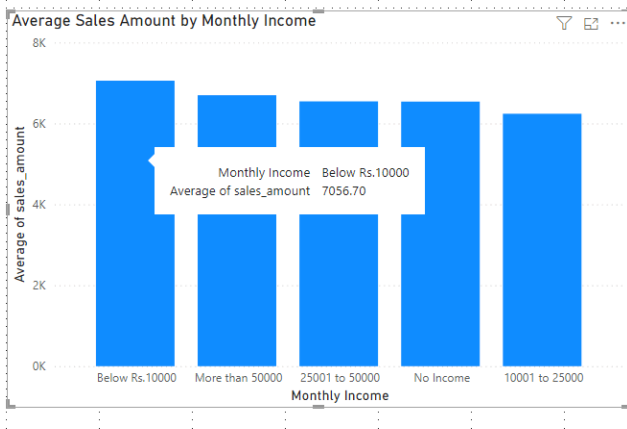

On average, women (\$6,638.85) had higher purchasing behavior than men (\$6,509.27) by \$129.58.

Recommendations: Single 23 year old males who make less than 50k are not the highest spending demographic, however, customers who are single, have a monthly income below \$10k and prefer not to share their marital status do display the highest spending behavior. Zomato's could offer promotions or rewards that appeal to these demographics.
