Executive Summary

Return Rate Mockup

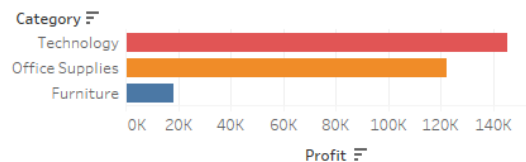

Return Rate & Total Profit

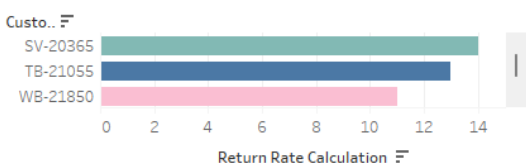

Return Rate by State

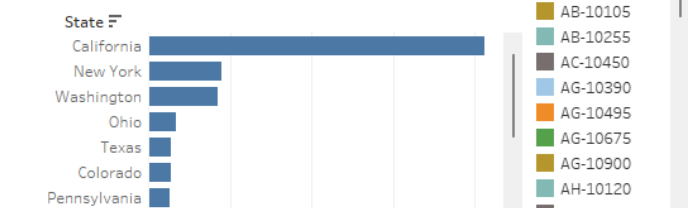

Return Rate by Category

Return Rate by Customer

Return Rate by State & Category

Story Arc

<

Returns should be calculated by a return rate that measures the total number of returns made.

Technology is the category most returned.

The root cause of returns is customers making between 2-14 returns.

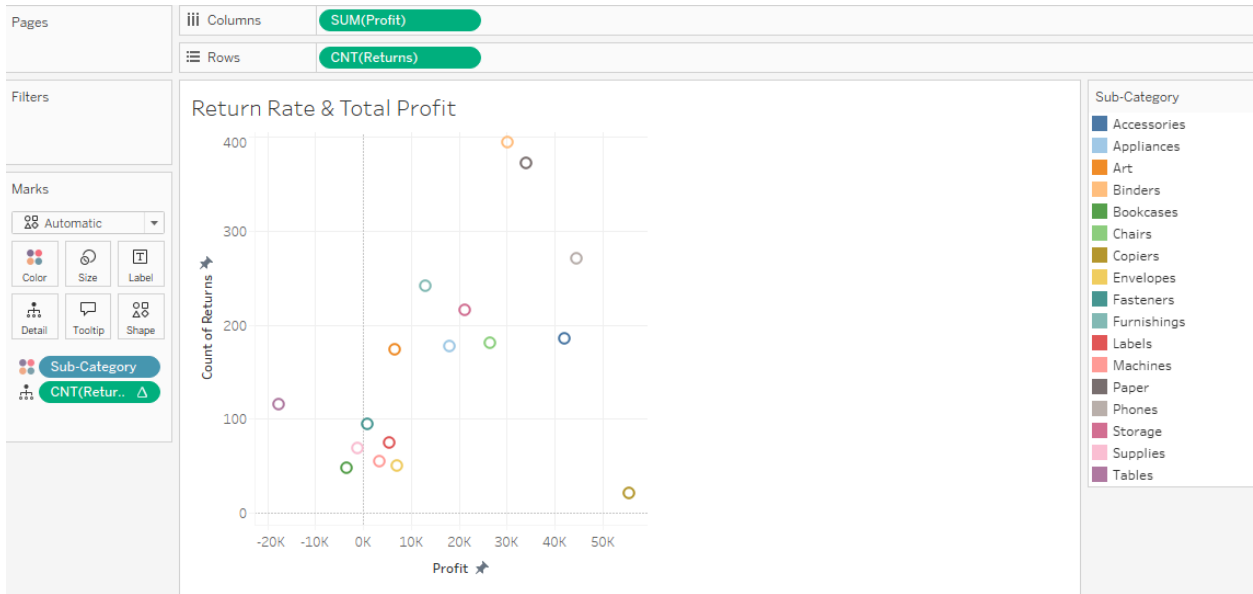

California is the state that makes the most returns.

Returns spike twice at the end of the year in September and December.

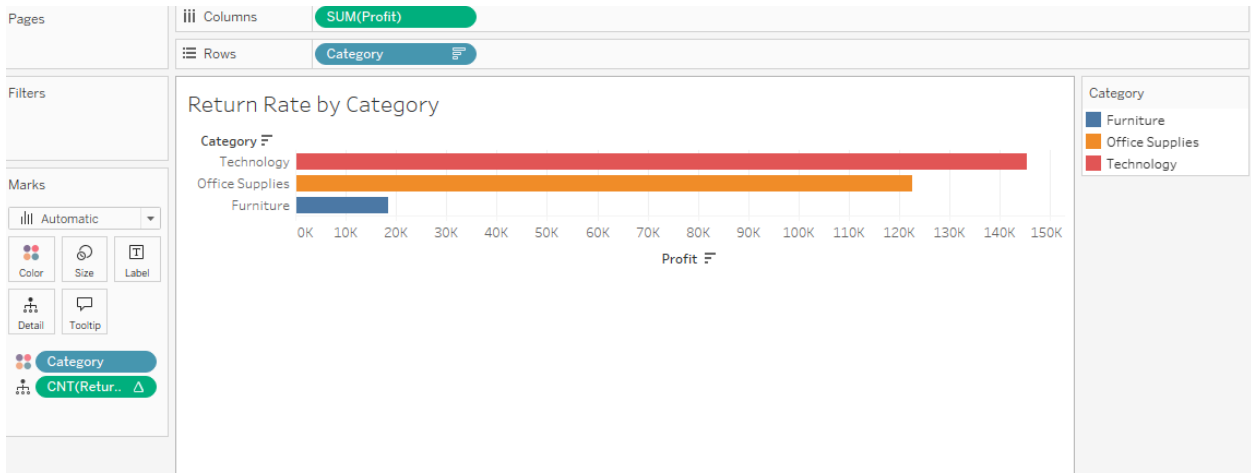

California, New York, and Washington have the highest return rates.
