Executive Summary

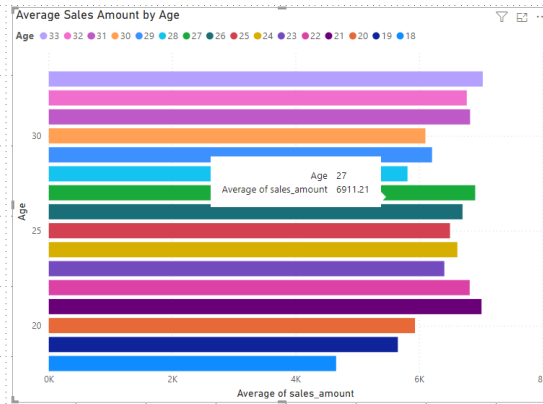

Recommendations

- **Total revenue from all customers over the 4 year period is \$987 million dollars:** To commemorate the revenue and celebrate their customers, Zomato may consider a promotion that gives back to the community.
- **Customers ranged from 18-33 years old with the top 5 age groups averaging the highest purchase behavior: 21-22, 27, 31 and 33:** Zomato may consider opening more locations in areas where this demographic traffic is highest, including college campuses, stadiums, recreation areas and music venues.
- **The highest spending income bracket are customers with a monthly income below \$10k:** Zomato may consider increasing marketing budgets to offer promotions and incentives to students and young adults.
- **Single customers spend more than married customers, but the highest spending demographic is 'prefer not to say':** Zomato may consider expanding marketing to make this demographic feel more seen and welcomed.
- **On average, women spend more than men:** Zomato may consider offering a ladies night or promotion to women on some occasions.
